

## Product Description

### What is eeZee50™?

eeZee50™ is a lipid-based Ready-to-Use Supplementary Food for the prevention of acute malnutrition in children older than 6 months of age.

eeZee50™ is packed in 50 g metallized foil sachets. 140 sachets are packed in a strong corrugated cardboard carton.

### How to eat

eeZee50™ does not require any preparation and can be consumed directly from the sachet.

The recommended daily serving is one sachet (50 g) per child.

The consumption of eeZee50™ should be accompanied by breast milk or clean drinking water.

### Recommendations for use

eeZee50™ can be used as a supplement to continued breastfeeding and local food during at-risk periods such as the time between harvests.

eeZee50™ should not be given to children under 6 months of age.

Continued breastfeeding is recommended until 24 months of age and beyond (exclusive breastfeeding until 6 months).

Hand washing with water and soap is recommended before consumption.

### Nutritional quality

eeZee50™ is composed of nutritious ingredients to provide additional energy, high quality protein and approximately one RDA of micronutrients for children aged 1-3 years.

The vitamin compounds and mineral salts used comply with Codex Alimentarius CAC/GL (1).

The protein, fat, vitamin and mineral content of eeZee50™ is in accordance with World Food Programme specifications (2).

### Food safety

There is no risk of microbiological growth during storage due to very low water activity. The shelf life is minimum 24 months from the manufacturing date when stored below 30 °C in a dry place.

Consume eeZee50™ within 24 hours after opening the sachet.

The manufacturing of eeZee50™ complies with Codex Alimentarius CAC/RCP (3) and FSSC 22000 (4).
